

Pro-Nox with Passive Scavenger Option

For Aesthetic Clinics, Birthing Centers and Physician Offices who want to scavenge their patients' exhaled gases during inhaled analgesia (nitrous oxide) use.

The Pro-Vac Waste Gas Recovery System removes the gas from the procedure room, and offers that extra protection to the staff from any environmental exposure.

- ✓ Quiet
- ✓ Small & light weight
- ✓ Simple to operate and maintain
- ✓ Can be run continuously
- ✓ Wall mount or countertop for ultimate portability
- ✓ Requires installation of piping to the outside – 2" pipe

- ✓ Paired with the GD14610 interface, complete solution scavenging
- ✓ Anesthesia-grade interface ~ pressure-reliefs for patient safety
- ✓ Closed system from the patient to the outside
- ✓ Complete waste gas management for offices without wall suction
- ✓ Easily clamps onto the Pro-Nox basket for portability
- ✓ Affordable scavenging system

- ✓ Comes complete and ready to install! Just drill a 2" hole
 - Flex exhaust hose, wall pipe & exterior screened elbow fitting included for easy install

The complete unit fits in small confined spaces and is portable and easy to move between procedure rooms.
