

17 May 2016

Dear Colleagues,

**Be sure to attend the 14<sup>th</sup> Annual Meeting of IFATS in San Diego – November 17-20, 2016!**

This year's first day Symposium will be dedicated to **Process Engineering of Fat Grafts**. A panel of leading clinicians, researchers, and industry leaders will discuss and debate all the aspects involved in the harvesting, processing, and injection of Fat Grafts. Details such as aspiration pressures, size and type of cannula, processing details such as washing vs. centrifugation, injection canal types, and depot size will be addressed critically pulling in all the available information and expertise of our panelists. This is the first time a panel of this depth and breadth has been assembled to look at all aspects of the fat graft process. Don't miss out!

At the end of this session, we are also including an industry panel. Selected leaders in the field of adipose tissue, including [CAREStream America](#), will present their latest state of the art technologies in a scientific presentation format. We expect this to be a very interesting new addition to our program.

Following the presentation of accepted Free Papers the **2016 Regulatory Affairs Panel** will include Government, Academic and Industry perspectives. At the end of the day, join us at the beach for a unique and special evening.

**Finally, we would like to remind you that the deadline for abstract submission is Wednesday, June 8th.**

We welcome all abstracts related to Adipose Therapy and Science. Clinical presentations are particularly welcome as we are very interested in the work our clinicians have to contribute. Abstract submission can be accessed on our website, [www.ifats.org](http://www.ifats.org)

To join the IFATS mailing list and be kept informed about this year's conference, contact [ifats@conmx.net](mailto:ifats@conmx.net)

Looking forward to seeing you in San Diego,

*Ricardo Luis Rodriguez, MD*

IFATS President
